## Experience

Orient Software Development Corp.

4 years 7 months

Fullstack Web Developer

April 2022 - Present (3 years)

Vietnam

Work with Conexus and being responsible for the web app products, includes Followup and Survey. Main tasks include:

- + Research & incorporate new technologies (VueJS, .NET Core 6, Pinia...) to new web apps.
- + Update Azure Infrastructure code for new web app services (firewall policy rules, pipeline, ...).
- + Create POC for new features (biometrics authentication with FIDO).
- + Migrate current frontend libraries to new versions (Bootstrap 5).

Azure DevOps

September 2022 - March 2023 (7 months)

Vietnam

Work with Conexus to migrate their whole infrastructure from on-premise BaseFarm servers to Azure Cloud. Main tasks include:

- + Manage security flow between app services with Firewall policies, Network security group rules
- + Manage deployment of app services with Pipelines.
- + Manage app service deployment definition template with ARM and Bicep.
- + Manage containerized app services with Azure App Service and Azure Container Instance.
- + Manage the metrics & insights of app services with Application Insights.

### Frontend Web Developer

May 2022 - August 2022 (4 months)

Vietnam

Work with Conexus and responsible for the front-end of their website products, mainly Engage Followup. Main tasks include:

- + Implement frontend functionality for web app.
- + Implement UI/UX for web app, including create font icon from SVG designs.
- + Refactor code, fix bugs, make changes to codes when needed.
- + Follow the SCRUM framework.

Technologies used:

- + ASP.Net (MVC, Razor, Bundle Optimization)
- + jQuery
- + Bootstrap
- + LESS (dotLess)

### Web Development Lead

September 2020 - April 2022 (1 year 8 months)

Ho Chi Minh City, Vietnam

Work with Conexus and Singapore MOE (Ministry of Education), being responsible for one of the modules of their E-Learning government product OPAL (One Portal All Learners), called CSL (Collaborative and Social Learning). It is a web app that provides communities for learners.

Main tasks include:

- + Manage a small team of web development to make sure they follow the SCRUM framework.
- + Implement features for the web app by being fullstack developer.
- + Integrating the web app with AWS.
- + Work on improving the web app by resolving SSAT and SPT issues.

Technologies used:

- + Humhub Framework (Yii Framework 2)
- + Redis
- + ElasticSearch
- + Docker
- + CkEditor (also ProseMirror)
- + grunt
- + jQuery
- + Bootstrap
- + LESS

### Conexus

2 years 9 months

#### Web Development Team Lead

October 2019 - September 2020 (1 year)

Ho Chi Minh City, Vietnam

Work with Conexus and Singapore MOE (Ministry of Education), being responsible for one of the modules of their E-Learning government product OPAL (One Portal All Learners), called CSL (Collaborative and Social Learning). It is a web app that provides communities for learners.

Main tasks include:

- + Manage a small team of web development to make sure they follow the SCRUM framework.
- + Implement features for the web app by being fullstack developer.
- + Integrating the web app with AWS.
- + Work on improving the web app by resolving SSAT and SPT issues.

Technologies used:

- + Humhub Framework (Yii Framework 2)
- + Redis
- + ElasticSearch
- + Docker
- + CkEditor (also ProseMirror)
- + grunt
- + jQuery
- + Bootstrap
- + LESS
