Top Skills

Front-end Development
Cloud Services
English

Languages

Japanese (Elementary)
English (Full Professional)
Vietnamese (Native or Bilingual)

Certifications

Certified Senior JavaScript Developer
Microsoft Certified: Azure Administrator Associate
Certified Senior Vue.js Developer
EF SET English Certificate 79/100 (C2 PROFICIENT)

Honors-Awards

Conexus Service Award (5+ years)
Orient Software Loyalty Award (10+ years)

Publications

Designing a Microservice-Friendly Datahub
Web Authentication Demystified — From Concepts to Real-World
Understanding Cron from First Principles to Production
Passwordless: Modern Authentication Patterns for PWAs

Tùng Nguyễn

Senior Technical Lead @ Hitachi Digital Services | Fullstack • Cloud Architect
Ho Chi Minh City, Vietnam

Summary

Technical Lead & Full-Stack Architect with 10+ years of experience engineering web applications, leading cloud-native migrations, and modernizing enterprise architectures. I specialize in bridging front-end systems with cloud infrastructure—leveraging architectural patterns (BFF, microservices), security protocols (FIDO biometric auth, JWT, OIDC), and automated DevOps pipelines.Core Impact & Capabilities:◦Technical Leadership: Led cross-functional Scrum teams delivering platforms for global clients including FUJIFILM, Hitachi Solutions, and the Singapore Ministry of Education.◦Cloud & Infrastructure: Microsoft Certified Azure Administrator experienced in IaC, containerized app deployments, application monitoring, and AWS serverless services.◦Frontend Architecture: Deep expertise in Vue 3 (Pinia, PrimeVue), as well as hands-on experience with React and .NET Core, with a proven history of modernizing legacy systems and reducing technical debt.◦AI-Assisted Workflow: Integrating GitHub Copilot and AI tooling into delivery cycles to accelerate technical analysis, implementation, and automated testing.

Experience

Hitachi Digital Services — APAC

Senior IT Consulting & Implementation
January 2026 - Present (9 months)
Ho Chi Minh City, Vietnam

★ Tech Lead:

◦Desktop Publishing Platform (Client: FUJIFILM): Acted as Technical Lead for desktop app migration (Pintail), directing front-end architecture, parallel processing feature development, and foundation restructuring using ElectronJS, ReactJS, NestJS, and fabric.js.

★ Senior Engineer:

◦Enterprise Document Automation (Client: FUJIFILM): Engineered configurable multi-step pipeline features and Microsoft Teams notification integrations across a 50+ microservice cloud ecosystem using Node.js, AWS Lambda, SQS, and DocumentDB.
◦ESG & Carbon Accounting Platform (Client: Hitachi Solutions): Built a Vue 3/PrimeVue web client (EcoAssist) featuring raw utility-to-tCO2 conversion pipelines, Scope 1 & 2 compliance reporting, and carbon credit lifecycle tracking.

Orient Software Development Corp.
Senior Software Engineer
September 2020 - December 2025 (5 years 4 months)
Ho Chi Minh City, Vietnam

★ Tech Lead (Singapore Ministry of Education):
Led a Scrum team delivering the OPAL e-learning platform (CSL module), significantly boosting system reliability and stability by systematically resolving SSAT and SPT issues.

★ Senior Fullstack Developer (Conexus - Norway):
Modernized web products (Elevate, Engage, FollowUp) by implementing BFF architecture, JWT authentication, Vue.js/Pinia, .NET Core, and FIDO biometric authentication POCs.

★ DevOps Engineer (Conexus - Norway): Executed cloud migration from on-premise BaseFarm servers to Azure Cloud, establishing automated deployments, containerized app services, and IaC.
◦Open-Source Project: Created an Azure Firewall Policy Optimizer tool to parse ARM template JSON, eliminating rule redundancy and simplifying cloud security management.
Github: https://github.com/nguyenviettung7691/azure-firewall-policy-optimizer

Conexus
Senior Software Developer
January 2018 - September 2020 (2 years 9 months)
Ho Chi Minh City, Vietnam

★ Tech Lead (Singapore Ministry of Education): Led a Scrum team building full-stack features for the OPAL e-learning platform (CSL module), improving product stability through targeted SSAT and SPT issue resolution.

★ Senior Frontend Developer (Conexus & Conexus SG - Norway): Modernized web client architectures by upgrading legacy libraries, building reusable web components, and refining client-side workflows for products including Conexus Companion and Coursepad.

Orient Software Development Corp.
Frontend Developer
October 2014 - January 2018 (3 years 4 months)
Ho Chi Minh City, Vietnam

★ Client: Conexus (Norway).

◦ Responsive Web Engineering: Built and maintained responsive web applications using ASP.NET MVC (Razor), jQuery, and LESS.

◦ Performance & UX Optimization: Ensured cross-browser compatibility, optimized asset bundling using Microsoft Optimization, and engineered modular JavaScript architectures alongside custom UI/UX graphics.

F2Tech.Asia JSC
Fullstack Developer
October 2013 - September 2014 (1 year)
Ho Chi Minh City, Vietnam

★ Employer: F2Tech.Asia (formerly VNYI) - Vietnam.

◦ Multi-Platform Product Engineering: Built core products across desktop (C# WinForms, DevExpress), web (ExtJS), and hybrid mobile platforms (Cordova, Telerik, Kendo UI).

◦ Database Optimization: Designed and maintained complex SQL Server stored procedures to ensure high data reliability and query performance.

Education

Hoa Sen University (Respect Diversity)
Bachelor's degree of Information Technology, Information Technology · (2009 - April 2014)
